

A systematic approach

polymos

Analysis

Our representatives evaluate your needs and expectations. They identify specific requirements in terms of application, marketing and cost.

Conceptual design

Polymos proposes different concepts, permitting you to choose the one that provides the most effective cost/design solution.

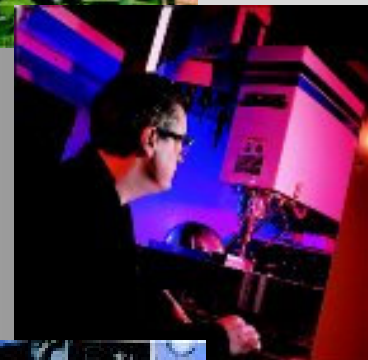

Validation

Project check points are established at the onset, allowing you to track and validate the development of your product from start to finish.

Tool making

The moulds and accessories required for the project are made in Polymos' specialized tool shop. To ensure optimal performance, production engineers are involved in the initial phase of mould design.

Production and Quality Assurance

Qualified staff and state-of-the-art equipment allow Polymos to combine performance and versatility. Indeed, every product is subjected to a stringent, internationally recognized quality assurance program to which every employee is committed.

Customer service

The reliability and efficiency of our customer service is based on the following principle: commitment to delivering your product on time. Furthermore, all information regarding your order, stock level and shipping schedule, is managed by the same person.
